## Centrifuge Tube Round Bottom 16 ml (P.P)

**Sku :** GE6271

[www.geomatrixlabs.com](http://www.geomatrixlabs.com)

### Description

Centrifuge tubes with round bottoms, skillfully molded from polypropylene and polycarbonate. These tubes offer excellent clarity and can withstand pressures up to 50,000xG. While autoclavable, repeated autoclaving in PC tubes may reduce their mechanical strength.
