Cryo Vail 1.8 ml

Sku : GE6304

www.geomatrixlabs.com

Description

Cryo vials, designed for efficient storage of biological material, including human and animal cells. These sterilized tubes feature white, prominent graduations and a long marking area for easy sample identification. The vial cap is equipped with a seal ring inside, ensuring complete leakproof protection. With longitudinal grooves in the base, these vials offer a non-twisting feature when placed in a cryo rack.
