Forceps – Tweezer

Sku : GE6641

www.geomatrixlabs.com

Description

Instruments used to grasp, move, or extract often small or delicate items. Products may be made of disposable plastics, autoclavable plastics, titanium, stainless steel, or other strong, corrosion- or chemical-resistant materials, and they may have curved tips to make them easier to use for particular tasks like surgery and dissection. For usage in cleanrooms and other controlled conditions, plastic versions may be provided sterile in individual packets.
