# Rotatable Multi Rack

**Sku :** GE6358

## Description

Rotatable Multi Rack is a versatile laboratory apparatus designed to accommodate various sizes of tubes. It provides efficient sample storage, allowing you to organize a large number of samples effectively. With its multi-level design and adjustable height through the adjustment screw, this rack can securely hold different sizes of test tubes. Additionally, its rotating feature enables convenient collection and removal of samples from different racks. Enhance your research with this practical and user-friendly multi rack solution.
