## Simple Cell Po

**Sku :** GE6691

[www.geomatrixlabs.com](http://www.geomatrixlabs.com)

### Description

The Simple Cell Pot is used to create basic cells, voltmeters, and other devices, as the name suggests. This pot, which was molded from polypropylene, has exceptional chemical resistance and very good contact clarity. This pot is much more robust than the typical one because it is made of polypropylene.
